

SUMMARY  
PROSPECTUS

9/30/2021

# Jensen Global Quality Growth Fund

Class J Shares **JGQJX**

Class I Shares **JGQIX**

Class Y Shares **JGQYX**

Before you invest, you may want to review the Jensen Global Quality Growth Fund's (the "Fund") prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <https://www.jenseninvestment.com/individual/how-to-invest/>. You may also obtain this information at no cost by calling 800-992-4144 or by sending an email request to [funds@jenseninvestment.com](mailto:funds@jenseninvestment.com). The Fund's prospectus and statement of additional information, both dated September 30, 2021, are incorporated by reference into this summary prospectus.

## Investment Objective

The objective of the Fund is long-term capital appreciation.

## Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and Example below.

### Shareholder Fees

(fees paid directly from your investment)

Class J	Class I	Class Y
None	None	None

### Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class J	Class I	Class Y
Management Fees	0.75%	0.75%	0.75%
Distribution and Shareholder Servicing (12b-1) Fees	0.25%	None	None
Shareholder Servicing Fee <sup>1</sup>	None	0.02%	None
Other Expenses	1.68%	1.34%	1.40%
Acquired Fund Fees and Expenses			
Total Annual Fund Operating Expenses	2.68%	2.11%	2.15%
Fee Waiver/Expense Reimbursements	-1.43%	-1.09%	-1.15%
Total Annual Fund Operating Expenses after Fee Waiver/Expense	1.25%	1.02%	1.00%

1. The Trust's Board of Trustees (the "Board of Trustees") has authorized a shareholder servicing plan fee in the amount of 0.10% of the Fund's average daily net assets for Class I shares. Currently, the shareholder servicing plan fee being charged is 0.02% of the Fund's average daily net assets for Class I shares; however, the fee may be increased to 0.10% of the Fund's average daily net assets for Class I shares at any time.
2. Pursuant to an operating expense limitation agreement between the Fund's investment adviser, Jensen Investment Management, Inc. (the "Adviser"), and the Trust, on behalf of the Fund, the Adviser has agreed to waive its management fees and/or reimburse expenses of the Fund to ensure that Total Annual Fund Operating Expenses (exclusive of front-end or contingent deferred sales loads, Rule 12b-1 plan fees, shareholder servicing plan fees, interest (including interest incurred in connection with bank and custody overdrafts), acquired fund fees and expenses, leverage (i.e., any expenses incurred in connection with borrowings made by the Fund), tax expenses, dividends and interest on short positions, brokerage commissions, merger or reorganization expenses and extraordinary expenses), do not exceed 1.00% of the Fund's average daily net assets through September 30, 2022. This operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees. The Adviser may request recoupment of previously waived fees and paid expenses from the Fund up to three years from the date such fees and expenses were waived or paid, subject to the operating expense limitation agreement, if such reimbursement will not cause the Fund's Total Annual Fund Operating Expenses (after the amount of the reimbursement is taken into account) to exceed the lesser of: (1) the expense limitation in place at the time of the waiver and/or expense payment; or (2) the expense limitation in place at the time of the recoupment.

### Example

This Example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods

indicated and either redeem or hold all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund operating expenses remain the same. The operating expense limitation agreement discussed above is reflected only through September 30, 2022. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class J	\$127	\$696	\$1,292	\$2,907
Class I	\$104	\$556	\$1,034	\$2,355
Class Y	\$102	\$562	\$1,049	\$2,392

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may generate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, and potentially higher taxes, which are not reflected in the annual fund operating expenses or in the Example, affect the Fund performance. For the fiscal year ended May 31, 2021, the Fund's portfolio turnover rate was 4.05% of the average value of its portfolio.

## Principal Investment Strategies

The primary focus of the Adviser is on the management of equity portfolios that are derived from a select universe of companies that produce long-term records of persistently high returns on shareholder equity. The Fund’s approach to investing focuses on companies determined by the Adviser to have a record of achieving a high level of business performance over the long term and which are, in the opinion of the Adviser, well positioned to maintain competitive advantages and continued high returns on equity and free cash flow.

The Fund will invest in equity securities of approximately 25 to 40 U.S. and foreign companies that satisfy the investment criteria described below. Equity securities in which the Fund invests as a principal strategy consist of publicly traded companies around the world, including securities issued by corporations located in developing or emerging markets. Generally, each company in which the Fund invests must, as determined by the Adviser: (1) have consistently achieved a high return on equity over the prior ten years; (2) be in excellent financial condition; and (3) be capable of sustaining outstanding business performance. These companies are selected from a universe

of companies that, as determined by the Adviser, have produced long-term records of consistently high returns on shareholder equity. In order to qualify for this universe, each company must have a market capitalization of \$1 billion or more, and a return on equity of 15% or greater in each of the last 10 years as determined by the Adviser. The Adviser determines on an annual basis the companies that qualify for inclusion in the Fund’s investable universe.

The Fund must always own the securities of a minimum of 15 different companies in its portfolio. The Fund strives to essentially be fully invested at all times in publicly traded common stocks and other eligible equity securities issued by companies that meet the investment criteria described in this Prospectus. The Fund’s investments in other eligible equity securities may include depositary receipts, such as American Depositary Receipts (“ADRs”), European Depositary Receipts (“EDRs”), Global Depositary Receipts (“GDRs”), or other forms of depositary receipts. The Fund typically invests in securities of issuers from at least three or more countries, including the United States, with at least 40% of the Fund’s net assets invested in foreign securities. In making a determination of whether an issuer will be classified as “domestic” or “foreign,” the Adviser will generally look to the location of the issuer’s domicile or principal headquarters. However, if the Adviser believes the issuer is headquartered in a jurisdiction primarily for tax purposes, it will consider other factors, such as the location of the issuer’s operational headquarters and senior management.

The Fund may purchase securities when they are priced below their full values as determined by the Adviser. The Fund may sell all or part of its position in a company when the Adviser has determined that another qualifying security has a greater opportunity to achieve the Fund’s objective. In addition, the Fund generally sells its position in a company when the company no longer meets one or more of the Fund’s investment criteria. In the event that the company no longer satisfies the investment criteria and the failure is due to an extraordinary situation that the Adviser believes will not have a material adverse impact on the company’s operating performance, the Fund may continue to hold and invest in the company.

The Fund is non-diversified, which means that a relatively high percentage of its assets may be invested in a limited number of securities.

# Principal Risks of Investing in the Fund

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take.

Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund.** The principal risks of investing in this Fund are:

## + *Stock Market Risk*

The market value of stocks held by the Fund may decline over a short, or even an extended period of time, resulting in a decrease in the value of a shareholder's investment.

## + *Management Risk*

The Adviser may be incorrect in its judgment of the value of particular stocks. The investments chosen by the Adviser may not perform as anticipated. Certain risks are inherent in the ownership of any security, and there is no assurance that the Fund's investment objective will be achieved.

## + *Newer Fund Risk*

The Fund is newer with a limited operating history, and there can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Board may determine to liquidate the Fund.

## + *General Market Risk*

Certain securities selected for the Fund's portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time.

## + *Recent Market Events Risk*

U.S. and international markets have experienced significant periods of volatility in recent months and years due to a number of economic, political and global macro factors including the impact of the coronavirus (COVID-19) global pandemic which resulted in a public health crisis, business interruptions, growth concerns in the U.S. and overseas, travel restrictions, changed social behaviors, rising inflation, and reduced consumer spending. While U.S. and global economies are recovering from the effects of COVID-19 the recovery is proceeding at slower than expected rates and may last for a prolonged period of time.

## + *Company and Sector Risk*

The Fund's investment strategy requires that a company selected for investment by the Fund must have attained, among other criteria, a return on equity of at least 15% per year for each of the prior 10 years as determined by the Adviser. Because of the relatively limited number of companies that have achieved this strong level of consistent, long-term business performance, the Fund at times is prohibited from investing in certain companies and sectors that may be experiencing a shorter-term period of robust earnings growth. As a result, the Fund's performance may trail the overall market over a short or extended period of time compared to what its performance may have been if the Fund was able to invest in such rapidly growing, non-qualifying companies.

## + *Non-diversification Risk*

The Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in the obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's net asset value ("NAV") and may make the Fund more volatile than more diversified funds.

## + *Foreign Securities and Currency Risk*

Non-U.S. securities are subject to risks relating to political, social and economic developments abroad and differences between U.S. and foreign regulatory requirements and market practices, including fluctuations in foreign currencies. A change in the value of a foreign currency against the U.S. dollar will result in a corresponding change in value of securities denominated in that currency. Issuers of foreign securities may not be required to provide operational or financial information that is as timely or reliable as those required for issuers of U.S. securities. The income or dividends earned on foreign securities may be subject to foreign withholding taxes. The securities of foreign companies are frequently denominated in foreign currencies. To the extent that a market is closed while the markets for the underlying currencies remain open, certain markets may not always reflect significant price and rate movements.

## + *Brexit Risk*

The United Kingdom withdrew from the European Union (EU) on January 31, 2020 following a June 2016 referendum referred to as "Brexit." Although the UK and EU have made a trade agreement that was entered into force on May 1, 2021, certain post-EU arrangements were outside the scope of the negotiating mandate and remain unresolved and subject to further negotiation and agreement. There is significant market uncertainty regarding Brexit's ramifications, and the range of possible political, regulatory, economic and market outcomes are difficult to predict. The uncertainty surrounding the UK's economy, and its legal, political, and economic relationship with the remaining member states of the EU, may continue to be a source of instability and cause considerable disruption in securities markets, including increased volatility and illiquidity, as well as currency fluctuations in the British pound's exchange rate against the U.S. dollar.

+ *Emerging Markets Risk*

Countries in emerging markets are generally more volatile and can have relatively unstable governments, social and legal systems that do not protect shareholders, economies based on only a few industries, and securities markets that trade a small number of issues. Emerging market securities may be subject to relatively more abrupt and severe price declines due to the smaller securities markets, lower trading volumes and less government regulation of securities markets in emerging market countries compared to those in developed countries. Investments in emerging market securities generally are more illiquid and volatile and subject to a higher risk of settlement disruptions than investments in securities of issuers in developed countries.

+ *Large-Cap Company Risk*

Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative smaller competitors. Also, large-cap companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion. The Adviser considers companies with market capitalizations in excess of \$10 billion to be large-cap companies.

+ *Growth Stock Risk*

The prices of growth stocks may be more sensitive to changes in current or expected earnings than the prices of other stocks and

may be out of favor with investors at different periods of time. Compared to value stocks, growth stocks may experience larger price swings.

+ *Depository Receipts Risk*

Investments in depository receipts may entail the special risks of foreign investing, including currency exchange fluctuations, government regulations, and the potential for political and economic instability.

+ *Regulatory Risk*

Legal, tax and regulatory changes could occur that may adversely affect the Fund's ability to pursue its investment strategies and/or increase the costs of implementing such strategies.

+ *Competitive Risk*

Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments.

## **Investment Suitability**

The Fund is designed for long-term investors who are willing to accept short-term market price fluctuations.

## **Performance**

When the Fund has been in operation for a full calendar year, performance information will be shown here. Updated performance information is available on the Fund's website at [www.jenseninvestment.com](http://www.jenseninvestment.com), or by calling the Fund toll-free at 800-992-4144.

# **Management**

## **Investment Adviser**

Jensen Investment Management, Inc. is the Fund's investment adviser.

## **Portfolio Managers**

The Fund is managed by the Adviser's investment team for the Fund, which is composed of:

Portfolio Manager	Years of Service with the Fund	Primary Title
Eric H. Schoenstein	Since April 2020	Chief Investment Officer and Managing Director
Robert D. McIver	Since April 2020	President and Managing Director
Allen T. Bond	Since April 2020	Head of Research and Managing Director
Kevin J. Walkush	Since April 2020	Head of ESG and Portfolio Manager

All members of the Fund's portfolio management team share responsibility jointly and primarily in managing the Fund and making decisions regarding the Fund's investments.

## Purchase and Sale of Fund Shares

You may purchase or redeem shares by mail (Jensen Global Quality Growth Fund, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701 (for regular mail) or 615 East Michigan Street, 3rd Floor, Milwaukee, WI 53202 (for overnight or express mail)), by telephone at 800-992-4144, on any day the New York Stock Exchange ("NYSE") is open for trading, or by wire. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. The minimum initial and subsequent investment amounts are as follows:

	Minimum Investment Amount	
	Initial	Additional
Class J Shares	\$2,500	\$100
Class I Shares	\$250,000	\$100
Class Y Shares	\$1,000,000	\$100

These minimums may be waived for accounts held in qualified retirement or profit sharing plans, and/or omnibus accounts established by financial intermediaries where the investment in the Fund is expected to meet the minimum investment amount within a reasonable time period as determined by the Adviser. Registered investment advisors and broker-dealers may generally meet the minimum investment amount by aggregating multiple accounts with common ownership or discretionary control within the Fund.

## Tax Information

The Fund's distributions will be taxed as ordinary income or long-term capital gains, unless you are a tax-exempt investor or are investing through a tax-deferred or other tax-advantaged arrangement, such as a 401(k) plan or an IRA. You may be taxed later upon withdrawal of monies from such tax-deferred or other tax-advantaged arrangements.

## Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. You may be required to pay commissions and/or other forms of compensation to the broker-dealer or other intermediaries for transactions in the Fund, which are not reflected in the fee table or expense example. Ask your adviser or visit your financial intermediary's website for more information.
